

Wiring Code for Voltmeter

If your system has a Street Charger, connect these wires to the Street Charger as follows:

Without Street Charger

Black	"Ground" post		Ground
Brown	Green terminal		Ignition
Translucent Blue	"Out" post at top of charger		Last battery positive

Calibrate your meter by adjusting the small gain pot on the back. You can use a hand-held meter to measure your voltage and turn the gain up or down until it matches the hand-held meter.
